

**Best overall value for SAN management software!**

**metaSAN** is a feature-rich, robust **metaSAN** powerful SAN management software that **metaSAN** provides the software and **metaSAN** built for

Typical SAN configurations include Fibre Channel, iSCSI, and NFS. The following diagram shows how metaSAN works:

**metaSAN** turns standard NTFS and HFS+ file systems into separate SAN volumes. The built-in metaSAN

**metaSAN** is a thin software layer that runs on all SAN members. It provides the file system translation and

All volumes managed by **metaSAN** are protected against **metaSAN** processes using a proprietary
