

## Media and Entertainment

Optimize content creation with high-performance and reliable storage solutions

With the rapid evolution of the media industry, content creators are challenged to deal with more complex workflows and larger data volumes.

Infortrend storage systems meet these demands with proven throughput power, AV-optimized features and high reliability.

### Benefits

- Boost the workflow efficiency of multiple simultaneous HD and SD streams
- Protect valuable media content against logical and physical storage errors
- Flexibly expand storage to accommodate and process large-sized media files
- Minimize administration efforts to configure, monitor, maintain and optimize storage systems
- Maximize storage investment to support rich media files

### Related products

- [ESVA Family](#) - Ideal for Fibre Channel or IP SAN applications of mid-range to large enterprises
- [EonStor DS Family](#) - Entry-level storage solutions delivering excellent price-performance and advanced features

- [EonNAS Family](#) - Serves file and block-based applications with a unified storage platform

## Related software

- [Distributed Load Balance](#) - Experience optimized performance with dynamic, automatic load balanc
- [Local Replication](#) - Snapshot and volume copy/mirror capabilities
- [Multi-pathing \(EonPath\)](#) - Accelerate throughput and ensure uninterrupted operations
- [Prioritized Volume Accessibility](#) - Prioritize data volumes to optimize performance based on applic
- [Remote Replication](#) - Provides excellent solutions for disaster recovery, data backup or migration
- [Snapshot](#) - Point-in-time, space-saving copies
- [Thin Provisioning](#) - Increase storage utilization, simplify capacity planning and management tasks
- [Volume Copy/Mirror](#) - Quickly restore production with full data copies
